

ROOFSEAL™

- One step PERMANENT repair system for all roofs & roof accessories
- 4 colors available (black, white, tan, & gray)
- UV stable

- **RoofSeal Plus** – Twice the adhesive for deeper penetration on granular surfaces. (Available in Black and White)

WEBSEAL®

- Maximum conformability for irregular surfaces
- Designed to hold all roof coatings, sealers or paint
- Fabric backing
- Perfect for making all roofs/surfaces watertight before coating is applied
- Easy & permanent solution for sealing flex duct systems
- Restores drain pans

ALUMIBOND™

- 4 mil aluminum backing for heavy duty applications
- Great for drain pans, tanks, troughs
- Creates moisture barrier
- **DUCT SEALING TAPE** – 2 mil aluminum backing with hybrid adhesive
- Fuses to rigid ductwork
- Good for preventing air and water leaks in ductwork

COPPERFLASH™

- 2 oz. real copper - *NOT a laminate!*
- Repair leaking seams on copper gutters, roofs & accessories
- Used for valley restorations
- **Real copper**, will patina over time

DOUBLESTICK™ / MICROSEALANT PUTTY TAPE

- For use between two surfaces including dissimilar surface materials
- Twist into rope and use to fill voids, gaps and holes.
- Good for night tie offs.
- Stops electrolytic action

WINDOWSEAL™

- Flexible, conformable window wrap that requires no screws, staples, or anchors to bond with any of these surfaces: Brick, wood, OSB, concrete, stucco, building wraps, plastic, vinyl, aluminum & metal. Great for cold weather applications

ETERNA CLEAN™

Quick and easy spray cleaner for all single ply roof surfaces. Prepares the surface for EternaBond MicroSealant tapes. Helps the release of contaminants like oxidation, grime, oil and grease, tree sap, etc.

ETERNA PRIME®

- Specially formulated to work with EternaBond MicroSealant tapes.
- Creates a stable surface for installation of EternaBond tapes
- Prepares challenging surfaces for repair (old tar, gravel, oxidized and rusty surfaces, brick, mortar, etc.)
- Allows installation of EternaBond tapes to -20°F
- Can be used over talc and on new EPDM

PRODUCT FEATURES/BENEFITS

- Use on all roofs (TPO, Hypalon, EPDM, aged PVCs, Rubber, Metal and more!)
- Stays flexible to -70°F
- Sag rating above 250°F
- Non-Hydroscopic
- Environmentally friendly
- Warranted for 15 years
- Up to 35 year life expectancy
- Integrated primer
- Pressure activated
- Install down to 40°F ambient without primer
- Install to -20°F ambient with EternaPrime
- Shelf life: 5+ years
- Fixes almost all non-plumbing water leaks
- Fast, easy installation!
